

Priority Action Approach

Scene Assessment

- Hazards? (what happened?)
- Mechanism of Injury? (Force/ Location)
- # of patients?
- What do I see?

Primary Survey

- **Airway**- is it open and clear?
- **Breathing**- What is the **Rate** and **Quality**?
- **Circulation**- **radial pulse – skin**
- **Damage** - **RBS & Decision**- **RTW, MA, RTC ?**
- **Evaluate**- review primary

Transport Decision-

- **Return to work** → **Treatment** → **First Aid Record**
- **Medical aid** → **Secondary Survey (Patient Assessment chart)** → **Treatment** → **Package Accordingly & Transport**
- **RTC** → **Packaging** → **Transport** → **Secondary Survey on rote**
 - Collar
 - Roll patient
 - Strap to board

Reassessments:

Non RTC:

- ABC's 10m
- Vitals 30m

RTC:

- ABC's 5m
- Vitals 10m
